

9-Valent HPV Vaccine (GARDASIL 9)

Limited Time Offer: Special price campaign

HPV vaccines (vaccines for cervical cancer) performed in developed countries are mostly 9-valent. HPV (human papilloma virus) not only becomes the cause of cervical cancer; it is known to become the cause of vulvar cancers, bladder cancers, or pharyngeal cancers.

HPV vaccination is recommended not only to women, but also to men.

GARDASIL 9 covers:

types 6, 11, 16, 18, 31, 33, 45, 52, and 58.

Among these, the vaccine that will be effective to prevent condylomata acuminata are those that contain type 6 and 11.

Therefore Gardasil 9 will also be effective for preventing condylomata acuminata.

Normally the vaccination costs ¥36,500 per shot, but during this campaign period, you can get vaccinated at a special price of ¥25,000.

※ The period of this campaign is limited up to the end of October. If you have got the first shot at our clinic with this special offer, the 2nd and 3rd shots will be of regular price.

Please make an appointment by phone call 03-3478-4747 in advance.
