

Antibody testing for corona virus (IgG & IgM*) is available.

If you wish to have the COVID-19 anti-body test, be sure to make an appointment before you come.

This test is not covered by Japanese health insurance card.

* When both IgG and IgM test positive, infection is present.
When IgG tests positive and IgM tests negative, you may possibly have been infected mildly in the past.
When both IgG and IgM test negative, infection is not present.

Please note that we do not provide PCR test in our clinic.
You can't have the anti-body test if you have such symptoms as cough, fever or dyspnea in the past 10 days.
